

PARTNER SEARCH FORM

for

Digital Europe Programme (DEP)

- ☒ I offer my expertise to participate as a Partner in a DEP Project
- ☐ I am planning to coordinate a Project and I am looking for Project Partners

TOPICS OF INTEREST

- TOPIC IDs: DIGITAL-2026-SKILLS-10-DIGITAL-HEALTH-STEP
- TOPIC Deadline: 1 October 2026, 17:00 CEST (Brussels time)
- Deadline for the expressions of interest: Open / As soon as possible (rolling basis until consortia are completed).

PARTNER INFORMATION

▪ **Description of the Legal Entity:**

- Higher Education ☐
- Research Institution ☐
- Public Administration ☐
- Industry / SME ☒
- NGO ☐
- Other: ☐

Please specify:

INFOAIKOS S.L.U. is a Spanish specialised scientific consultancy working at the intersection of health information management, health data governance, semantic interoperability and advanced digital skills for the European Health Data Space (EHDS).

Our mission is to help organisations, professionals and higher education institutions develop the competencies required for the trustworthy adoption of Artificial Intelligence in healthcare. Rather than developing AI technologies themselves, we focus on preparing the health information ecosystem that enables AI to operate safely, effectively and in compliance with European regulations.

Our expertise combines health information management, metadata, data quality, semantic interoperability, health data cataloguing, knowledge organisation and competence development. We bridge the gap between European policy, technical interoperability and workforce capacity building, translating complex regulatory and technical requirements into practical learning programmes, competence frameworks and training materials.

INFOAIKOS collaborates with universities, public administrations and European stakeholders involved in the implementation of the EHDS and contributes to the development of future digital skills for health professionals, health information specialists and data stewards.

▪ **Description and expertise of the team:**

The INFOAIKOS team combines practical experience in health information management, scientific research, higher education and European health data policy.

Core areas of expertise include:

- European Health Data Space (EHDS)
- HealthData@EU ecosystem
- Secondary use of health data
- Health data governance
- Health data quality assessment
- Metadata standards
- HealthDCAT-AP
- DCAT-AP
- FAIR principles
- Semantic interoperability
- Knowledge organisation
- Health information management
- Cancer registries and real-world health data
- SNOMED CT
- HL7 FHIR fundamentals
- Learning needs assessment
- Competence frameworks
- Curriculum development
- Microcredentials
- Advanced digital skills
- AI readiness in healthcare
- Capacity building
- Scientific dissemination

▪ **Potential role in the project:**

- Technology provider ☐
- Data provider ☐
- Research ☒
- Training ☒
- Dissemination ☒
- Other: ☒

Please specify:

INFOAIKOS can contribute to:

- Competence needs assessment for AI uptake in healthcare.
- Development of competence frameworks aligned with the EHDS.
- Design of university curricula and professional training programmes.
- Development of microcredentials and lifelong learning pathways.
- Learning materials related to health data governance, interoperability and AI-ready health information management.
- Integration of HealthDCAT-AP, metadata and semantic interoperability into educational programmes.
- Stakeholder engagement.
- Pilot training activities.
- Quality assurance of educational content.
- Dissemination and exploitation.

Expertise / competence needed in case of searching for Project Partners:

▪ **Other areas of interest for collaboration:**

INFOAIKOS is particularly interested in collaborating with universities, hospitals, research organisations, competence centres and SMEs working on:

- Artificial Intelligence in healthcare
- European Health Data Space
- Digital transformation of health systems
- Health information management
- Health data governance
- Semantic interoperability
- Metadata and catalogues
- Data quality
- Health workforce development
- Digital education
- Microcredentials
- Capacity building

▪ **Already experience in EU funded projects as a:**

- Coordinator: ☐ YES ☒ NO
- Partner: ☒ YES ☒ NO

▪ **Project experience and track record:**

INFOAIKOS brings together extensive experience in health information management, cancer registration, health data quality and European health data governance.

The team has actively contributed to national and European initiatives related to the implementation of the European Health Data Space, secondary use of health data, metadata standards and health data cataloguing. Our work includes scientific support for the Spanish Ministry of Health in activities related to the National Health Data Space, analysis of European implementing acts, HealthData@EU developments, HealthDCAT-AP and metadata for health data discovery.

The team also contributes to higher education through the design of postgraduate programmes and university microcredentials focused on the EHDS, interoperability, health data governance and advanced digital skills.

In addition, INFOAIKOS combines scientific research with practical implementation experience through collaboration with public health authorities, universities, European expert groups and population-based cancer registries.

This combination of policy knowledge, scientific expertise, educational experience and operational practice enables INFOAIKOS to translate European digital health priorities into high-quality learning activities and competence development programmes.
