Please specify:

SMARTS P.C. is a Greek private company and SME founded in 2013, providing consulting, project development and digital transformation services to public authorities, regional and local development organisations, destination management organisations and SMEs. The company designs and implements national and European initiatives in the fields of public-sector modernisation, smart and sustainable territorial development, tourism, cultural

**Funded by
the European Union**

heritage, mobility and SME digitalisation. Its activities combine strategic planning and EU project management while also developing tailored digital platforms and software solutions.

▪ **Description and expertise of the team:**

SMARTS P.C. designs and delivers digital transformation and innovation projects for public authorities, regional and local development organisations, destination management organisations and SMEs. The company brings together strategic, business and technical expertise to turn policy priorities and operational needs into practical, user-centred digital services and solutions. SMARTS' multidisciplinary team covers the full development cycle, from needs assessment, stakeholder mapping and requirements analysis to software development, platform design, data integration, business intelligence and AI-enabled applications. SMARTS also supports pilot implementation, project management, capacity building, dissemination and exploitation, as well as the development of sustainable business and governance models. The company has delivered digital platforms and software solutions in areas including smart cities, digital public services, destination management, sustainable tourism, cultural heritage, mobility, digital skills and SME digitalisation. Through its participation in Horizon 2020, Horizon Europe, Interreg Europe and Erasmus+ projects, SMARTS has worked with public authorities, research organisations, technology providers and SMEs across Europe thus enabling the team to contribute effectively to multidisciplinary consortia, support real-world pilots, engage end users and turn project results into scalable and sustainable services.

▪ **Potential role in the project:**

- | | |

| ▪ Other: | X |

Please specify:

SMARTS can participate as a technology and implementation partner, taking responsibility for clearly defined technical and operational tasks within the consortium. The team can contribute to requirements and process analysis, the design and development of digital platforms and applications, data integration, interoperable workflows, dashboards, business

**Funded by
the European Union**

intelligence and AI-enabled tools. SMARTS can also support pilot deployment, testing and validation with end users, as well as stakeholder engagement and capacity building. Its contribution would focus on delivering practical, scalable and sustainable solutions in close cooperation with sectoral, scientific, regulatory and end-user partners.

▪ **Other areas of interest for collaboration:**

Beyond the topics listed above, SMARTS P.C. is interested in collaborations related to digital public services, smart and sustainable territories, destination management, cultural heritage, SME digitalisation and advanced digital skills.

Topic-specific contribution

DIGITAL-2026-AI-DATA-10-COMPLIANCE: SMARTS can map regulatory reporting workflows and user requirements, design interoperable data flows and APIs, develop user-centred platforms, dashboards and AI-assisted monitoring functions, and support pilots and live demonstrations with public authorities, regulators, SMEs and other data holders. SMARTS can also contribute to data governance, auditability, scalability, uptake and exploitation, working with specialist partners on privacy-preserving technologies, encryption and machine-readable regulation.

DIGITAL-2026-BESTUSE-10-EHDS: SMARTS can act as a technology and implementation partner, translating operational, user and regulatory requirements into functional digital health services. The company can contribute to the development and integration of interoperable applications, digital workflows, user interfaces and dashboards, as well as to pilot deployment, testing and capacity building. SMARTS can work with health authorities, healthcare providers and standards experts to ensure alignment with the EEHRxF, HealthDCAT-AP and the broader interoperability and governance requirements of the EHDS.

▪ **Already experience in EU funded projects as a:**

- | | | |
|----------------|---|--|
| ▪ Coordinator: | ☐ YES | ☒ NO |
| ▪ Partner: | ☒ YES | ☐ NO |

▪ Project experience and track record:

RestCoVE - VET Excellence Pathways for Sustainable Collective Catering and Restaurants.

Programme: Erasmus+ Centres of Vocational Excellence | Project ID: 101260578 | Duration: 01 April 2026-31 March 2030. **SMARTS role:** Technology partner supporting the digital learning environment, online collaboration services and delivery of digital training resources for the transnational CoVE model.

SafeWeb - Cybersecurity and VET.

Programme: Erasmus+ KA220-VET | Project ID: 2025-1-SE01-KA220-VET-000352410 | Duration: October 2025-March 2028. **SMARTS role:** Technology partner contributing to the multilingual e-learning platform, cybersecurity educational game and technical integration, testing and pilot deployment.

VRtheCHEF.

Programme: Erasmus+ KA220-VET | Project ID: 2024-1-TR01-KA220-VET-000245625 | Duration: 01 December 2024-30 November 2026. **SMARTS role:** Technology partner contributing to the design, development and piloting of VR training applications for sustainable gastronomy and host of the project's learning, teaching and training activity in Greece.

POMEIL.

Programme: Erasmus+ KA220-ADU | Project ID: 2024-1-NO01-KA220-ADU-000244470 | Duration: 01 September 2024-31 August 2026. **SMARTS role:** ICT partner contributing to the gamified digital screening mechanism, personalised learning pathways, digital escape-room environment and pilot implementation.

Dest.AI - Integrated Destination Management Platform.
